Subject consultation on coherence and convergence report

Dear members of ERGEG,

With this letter the North-West European Market Parties Platform would like to respond to your consultation on the Coherence and convergence report you have issued recently. We will not go into details in this response. For that we would like to refer to the Eurelectric input in this consultation.

Our input is focussed on our region, CWE, and the connection with the Northern region. Our input are the three attached statements on the priority topics in these regions:

- day ahead capacity allocation and long term capacity rights
- cross border intra-day trade
- transparency

These statements were developed together with the representation of the Nordic market parties, Nordenergi, and will provide a guideline for the next coherent steps in the convergence within and between the two regions.

Please don't hesitate to contact us for any further questions.

Kind regards,

Eric van Vliet
Chairman North-West European Market Parties Platform
