

ER GEG Pilot FG Project & further Focus of WP2010

Tahir Kapetanovic, co-Chair of ER GEG
Electricity Network and Market Task Force

Florence Forum, Rome
10 - 11 December 2009

Contents

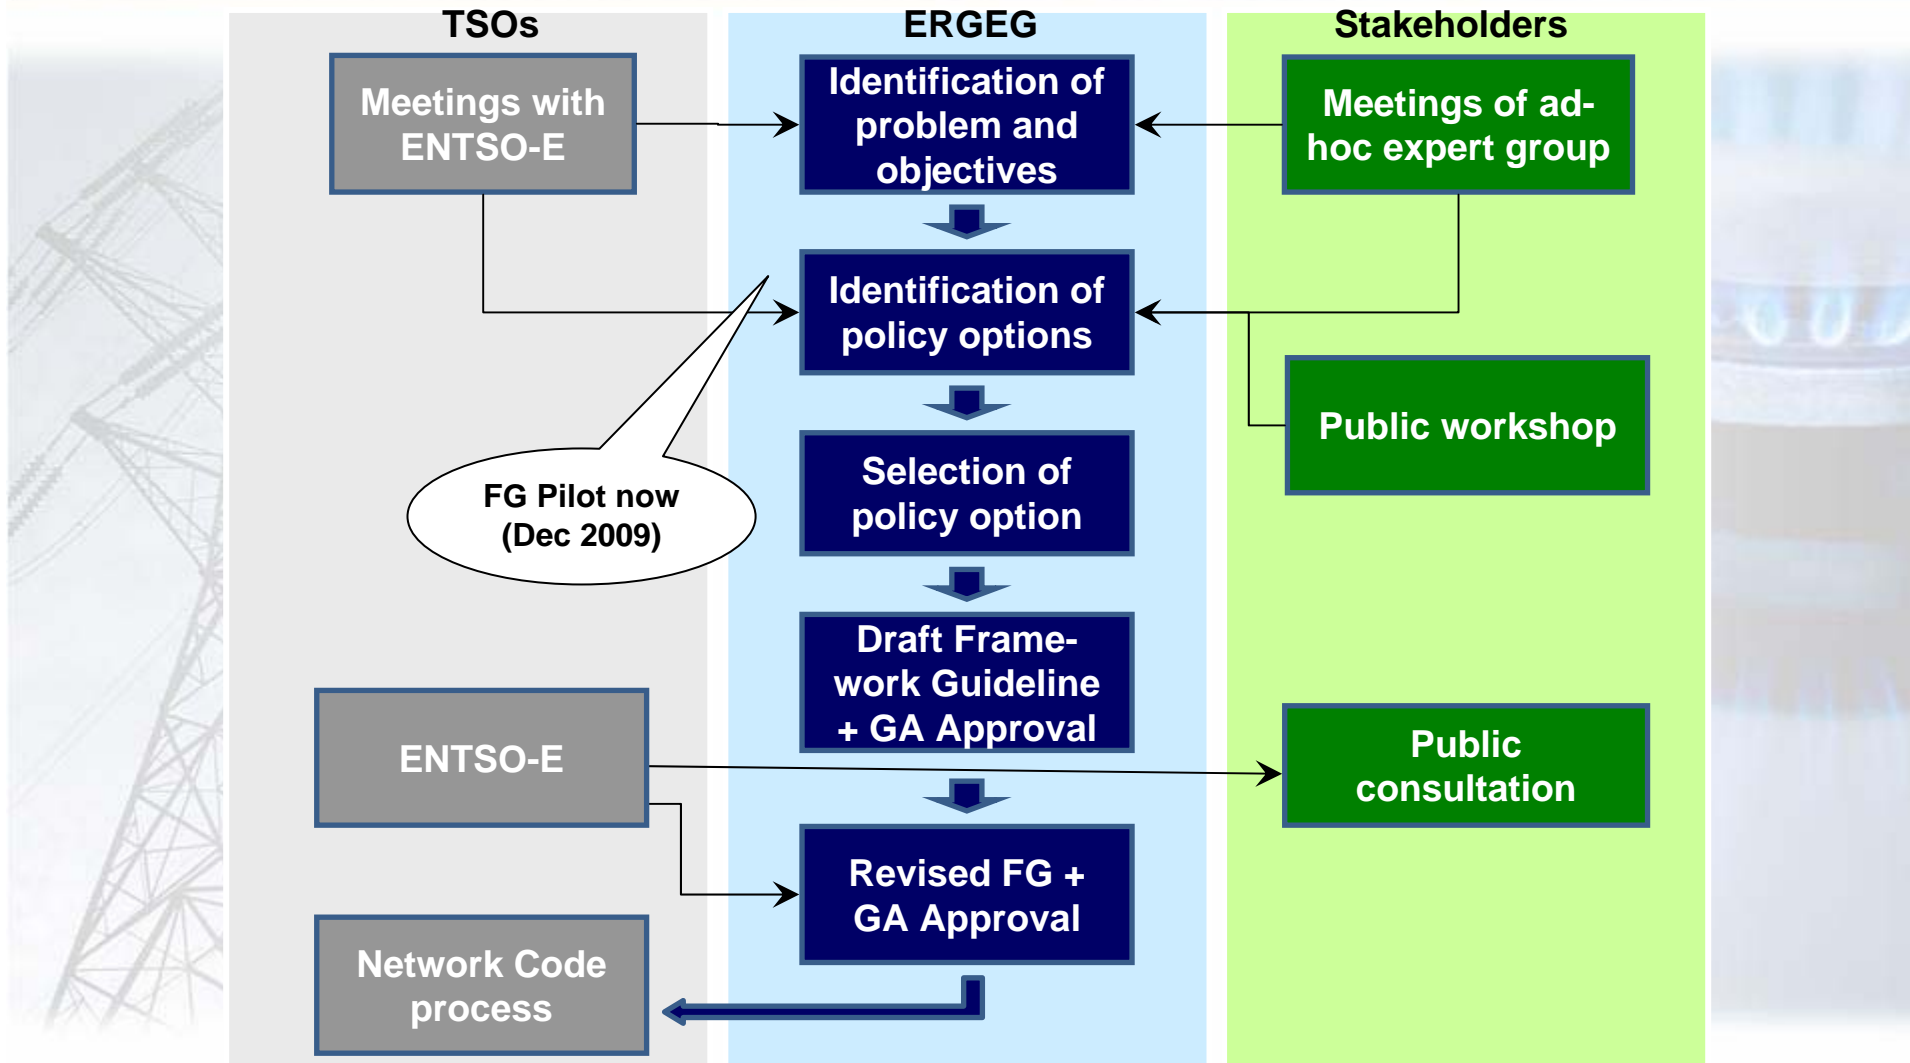

- Pilot FG Project Objectives
- Process, roadmap, contents
- Further WP 2010 focus in transition period

- **General**

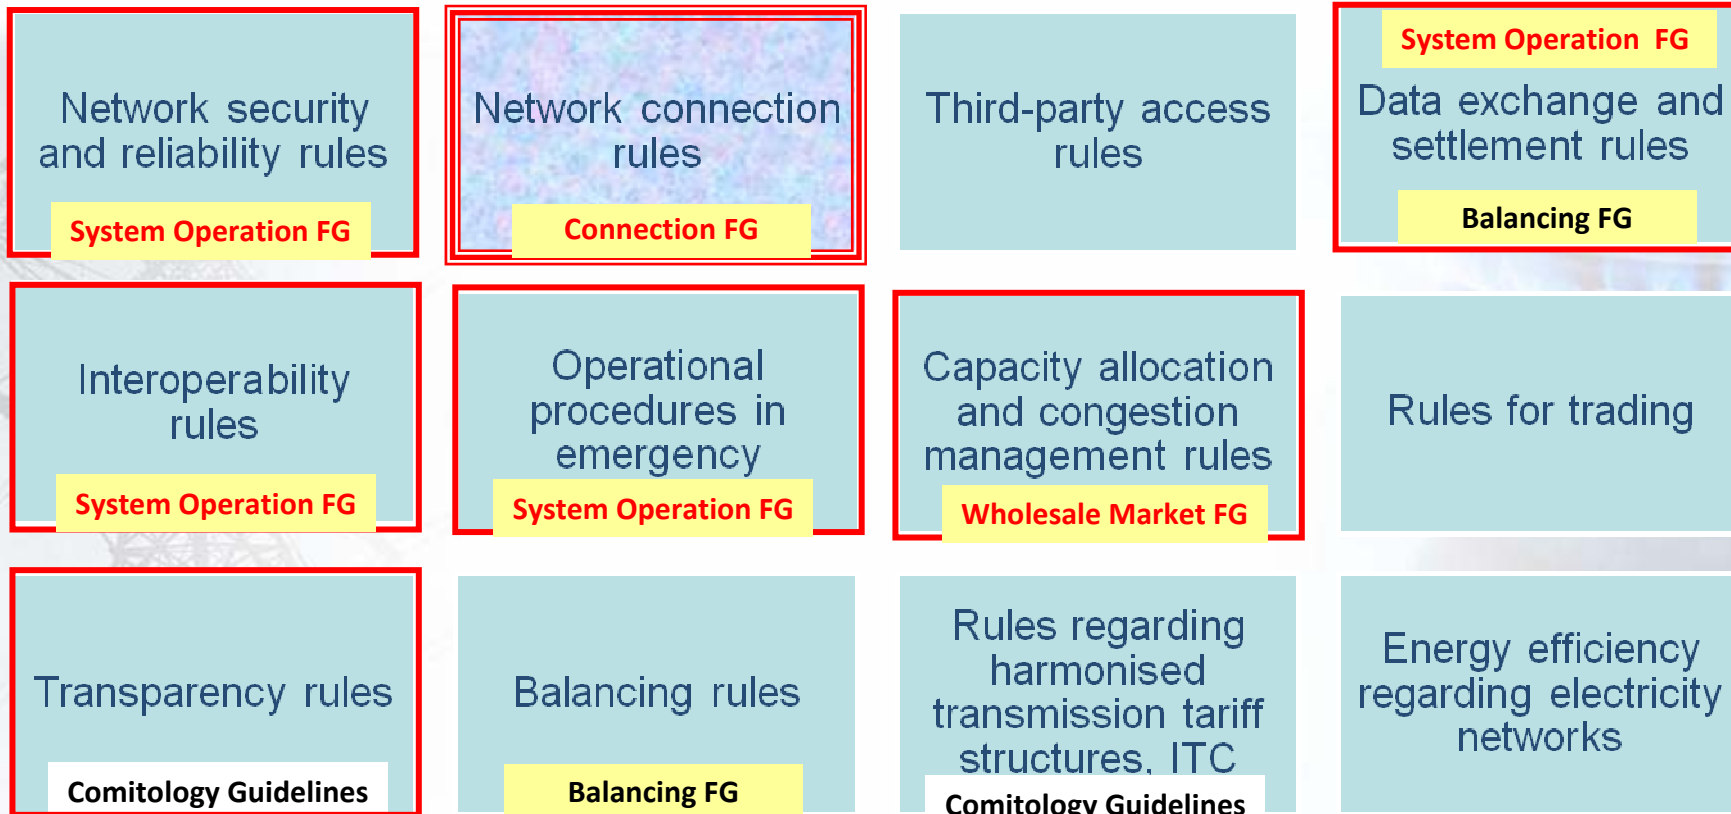

- Prepare the **high-quality FG input for the Agency** in the agreed priority areas
- **Test the defined process and adjust it** if and where necessary

- **Specific**

- (1st FG Project) **Pilot FG for Electricity Grid Connection**, agreed with the European Commission and ENTSO-E
- Align and **coordinate with ENTSO-E's** work on Pilot Network Code for Wind Connection
- Coordinate **timeline and completion with Gas Pilot** within ERGEG
- Coordinate with **EC Monitoring Group** (EC, ERGEG, ENTSO-E and ENTSO-G)

- Impact Assessment
 - Problem definition: general / policy context, action required, underlying drivers, affected entities, problem evolution
 - Objectives, policy options & selection
 - Expert Group setup and cooperation (http://www.energy-regulators.eu/portal/page/portal/EER_HOME/EER_FWG/Electricity/Grid_Connection/Ad%20hoc%20Expert%20Group)
- Draft FG → public consultation → revision → code process
- Content highlights (preliminary assumption)
 - Roles & responsibilities definition
 - Provisions for connection, information exchange & access limitation
 - Framework: general, generation, consumption, DSOs, exemptions

LEGEND:

Areas for codes cf. Article 8 (6) (a) – (l) of the Regulation (EC) 714/2009

Framework Guidelines cf. EU Commission Presentation of the 3rd Package at the XVI Florence Forum
