

2.3 Regulatory aspects of the Offshore RES Strategy by Sven Kaiser – Future Policy Work Stream Co-Chair

Regulators support the ambitious target (i.e. up to 300 GW offshore wind in 2050) → This will help to pave the way towards decarbonisation

Realisation will strongly impact on the market outcome - and raises market design issues (e.g. bidding zones)

+

Infrastructure planning and financing are key

+

Unbundling principles should be preserved

+

Cross-border characteristics require review of coordination procedures and competences

Regulators suggest a coherent approach to the offshore development
